

DOOR CONTROL MADE EASY

Four Simple Steps

- The visitor presses the call button on the front door panel - ringing the handset ...
- When the handset is lifted the user can talk to the visitor ...
- If the visitor is welcome the lock release button is pressed ...
- The electric lock release is activated unlatching the front door allowing the visitor to push the door open and enter.

Main Features

Door Panel

- The caller presses the button on the front door panel — ringing the handset
- Attractive and lightweight easy to use handset
- A maximum of four handsets can be fitted to the system
- Twelve months warranty after fitting and then a full maintenance service is available
- No expensive batteries required — the system is powered by a 12Volt plug-in transformer
- The system can be fitted to most types of door including timber, PVCu and aluminium. Normally operates with a Yale night latch type of lock. High security locks are available.
- Loud bells, flashing indicators and loop inductors can be fitted for the hard of hearing.

Handset
